CONTENTS TO VOLUME 44

CONTENTS Vol. 44, No. 1

1 A New Stabilized Formulation for Convective-Diffusive Heat Transfer **M. Ayub and A. Masud**

25 A General Method for Estimation of Boundary Conditions Over the Surface of Shields Surrounded by Radiating Enclosures **S. M. Hosseini Sarvari, J. R. Howell, and S. H. Mansouri**

45 Finite Element Solution of Non-Fourier Thermal Wave Problems **B. Xu and B. Q. Li**

61 A Simple Pressure Stabilization for a Simple-Like Equal-Order FEM Algorithm **C. Nonino**

83 Comparison of Two Methods for Solving Radiative Heat Transfer in a Gradient Index Semitransparent Slab **Yong Huang, Xin-Lin Xia, and He-Ping Tan**

CONTENTS Vol. 44, No. 2

101 Computations of Drop Dynamics with the Immersed Boundary Method, Part 1: Numerical Algorithm and Buoyancy-Induced Effect **Marianne Francois and Wei Shyy**

119 Computations of Drop Dynamics with the Immersed Boundary Method, Part 2: Drop Impact and Heat Transfer **Marianne Francois and Wei Shyy**

145 Boundary-Element Analysis of 3-D Diffusion Problems Using a Parallel Domain Decomposition Method **M. S. Ingber, C. C. Schmidt, J. A. Tanski, and J. Phillips**

165 A Node-Centered Pressure-Based Method for All Speed Flows on Unstructured Grids **Hyung-Il Choi, Dohyung Lee, and Joo-Sung Maeng**

187 One-Dimensional Transient Radiation Heat Transfer Modeling Using a Finite-Volume Method **John C. Chai**

165 A Node-Centered Pressure-Based Method for All Speed Flows on Unstructured Grids **Hyung-Il Choi, Dohyung Lee, and Joo-Sung Maeng**

187 One-Dimensional Transient Radiation Heat Transfer Modeling Using a Finite-Volume Method **John C. Chai**

CONTENTS Vol. 44, No. 3

209 Inverse Boundary Design Conduction-Radiation Problem in Irregular Two-Dimensional Domains **S. M. Hosseini Sarvari, J. R. Howell, and S. H. Mansouri**

225 A Comparison of Outflow Boundary Conditions for the Multidomain Staggered-Grid Spectral Method **G. B. Jacobs, D. A. Kopriva, and F. Mashayek**

253 Resolving the Controversy over Tin and Gallium Melting in a Rectangular Cavity Heated from the Side **Noureddine Hannoun, Vasilios Alexiades, and Tsun Zee Mai**

277 An Incompressible Navier–Stokes Model Implemented on Nonstaggered Grids **Tony W. H. Sheu and R. K. Lin**

295 A High-Efficiency Parallel Solution of the Radiative Transfer Equation **J. Tal, R. Ben-Zvi, and A. Kribus**

CONTENTS Vol. 44, No. 4

309 A Finite-Volume-Based Time-Splitting Scheme for Computation of Electrodeposition **Chunmei Xia and Jayathi Y. Murthy**

329 Prediction of Radiative Properties of Patterned Silicon Wafers by Solving Maxwell's Equations in the Time Domain **J. Liu, S. J. Zhang, and Y. S. Chen**

347 Reverse Time TLM Modeling of Thermal Problems Described by the Hyperbolic Heat Conduction Equation **A. L. Koay, S. H. Pulko, and A. J. Wilkinson**

365 Evaluation of a Fast Correlated-k Approach for Radiation Calculations in Combustion Systems **S. Dembele and J. X. Wen**

387 The Method of Constructing Dynamically Adapting Grids for Problems of Unstable Laminar Combustion **V. I. Mazhukin, I. Smurov, A. V. Shapranov, and M. M. Demin**

CONTENTS Vol. 44, No. 5

417 Parallel Domain Decomposition Approach for Large-Scale Three-Dimensional Boundary- Element Models in Linear and Nonlinear Heat Conduction **Eduardo Divo, Alain J. Kassab, and Franklin Rodriguez**

439 Solution To Inverse Heat Conduction Problem in Nanoscale Using Sequential Method **Sun K. Kim and Isaac M. Daniel**

457 Multiblock Implementation Strategy for A 3-D Pressure-Based Flow and Heat Transfer Solver **Rongguang Jia and Bengt Sundén**

473 A Fast Approximated Method of Radiative Exchange for Combined Heat Transfer Simulation **Seigo Sakai and Shigenao Maruyama**

489 Boundary Integral Solution of Thermal Radiation Exchanges in Axisymmetric Furnaces **S. P. Song and B. Q. Li**

CONTENTS Vol. 44, No. 6

509 Application of Galerkin Method to Conjugate Heat Transfer Calculation **Andrej Horvat and Ivan Catton**

533 Projection Methods for the Calculation of Incompressible Unsteady Flows **Ming-Jiu Ni, Satoru Komori, and Neil Morley**

553 A Variable-Density Projection Method for Interfacial Flows **Ming-Jiu Ni, Mohamed Abdou, and Satoru Komori**

575 Solving the Stefan Problem with the Radial Basis Function Collocation Method **I. Kovačević, A. Poredoš, and B. Šarler**
